EZ-Scan® Family of Software

EZ-Scan® Pro is PST's flagship desktop check scanning / image management product suite which can control all major brands of check scanners. EZ-Scan® provides total data and image management including verification software and license free retrieval viewers. Because of its Plug 'n Play design, our EZ-Scan® software can be modified by the user to add additional data fields without costly custom programming.

The EZ-Scan® family of software is an economical check, data, and image capture solution which can be easily configured and or customized for your specific needs. EZ-Scan® provides a robust check and payment capture solution that offers numerous enhancements over other remote capture product offerings. Features such as ICR/OCR, image validation, data validation, CAR/LAR, and data lookups can be performed on the checks. All data printed on checks and coupons can be captured including

Amount, Account Information, Payor, Address, Proof of signature and more. Electronic reports can be generated by EZ-Scan® and merged with existing banking software, check processors, databases and accounting systems. It provides seamless integration with your existing image or accounting platforms. The EZ-Scan® family of software products can also be used as a full featured standalone check image/data retention solution to meet any unique user requirements.

See the EZ-Scan® feature matrix and Plug-Ins to select the right EZ-Scan® version for your needs.

Outline of software levels to meet your needs.

EZ-Scan® Lite

- Low cost entry level product, great archiving capabilities to replace copy machines or microfilmers. Full auto indexing on batch and MICR line fields for easy retrieval.
- Checks are scanned and viewed from the same PC workstation. Images are saved to internal database.
- Batch and Check fields are captured and stored.
- Up to 2GB database/image storage.
- Built-in viewer with search capabilities.
- Built-in check field verifier.
- Import capabilities.
- Built-in reporting capabilities.
- Application-level security.
- Optional MICR repair tool (Uses OCR to correct misread MICR).

EZ-Scan®

Same capabilities as our Lite product but with the ability to store files and database on separate PC's. User defined batch fields. All of EZ-Scan® Lite features plus...

- Images may be stored to database or file system.
- User definable database location (Allows switching between databases).
- Email capability.
- Export capabilities.
- Customizable batch fields with search ability (up to five additional batch fields).
- MICR repair tool (Uses OCR to correct misread MICR).
- Check 21, X 9.37 export file that can be used with your bank(s).

EZ-Scan® NP

All of EZ-Scan® features plus...

- Customizable batch fields with search ability.
- Customer ID, Payers Name and Address fields with search and verify ability.
- Archiving module to move items offline.
- Manages multiple storage devices.
- Basic-level security.

EZ-Scan® Pro

All of EZ-Scan® features plus...

- Customizable batch fields with search ability (Up to twenty-five additional batch fields).
- Customizable Item fields with search and verify ability (Up to twenty-five additional Item fields).
- OCR-MICR validation feature (Repairs misread or rotated items using multiple OCR engines).
- Archiving module to move items offline.
- Manages multiple storage devices.
- Multi-user accessible.
- User-level security.
- Optional CAR/LAR ability with our Check Recognition Add-on.

EZ-Scan® Remittance

All of EZ-Scan® Pro features plus...

- Can read OCA-A or Barcode data lines from coupon document.
- Can scan mixed batches, check only, check - coupon, multi checks and multi coupons.
- Optional CAR/LAR ability with our Check Recognition Add-on.
- Can manage up to three different payments (on time, late payments, early payments).
- Extremely robust software at a economical cost.

- Optional component
- Included component

EZ-Scan®

Scanner Workstation Requirements

Computer/Processor

- Computer with Intel Core i5 2.5 GHz or higher processor recommended for check scanners speed up to 100 checks per minute.
- Computer with Intel Core i7 3.5 GHz or higher processor recommended for check scanners speed faster than 100 checks per minute.
- Minimum 4 GB of RAM

Hard Disk

Hard disk space requirements will vary depending on configuration; custom installation choices may require more or less. Listed below is the minimum hard disk requirement for EZ-Scan Software only:

- 487 MB of available hard disk space.

Drive

- CD-ROM drive

Display

- Super VGA (800 x 600) or higher resolution monitor with 256 colors

Operating System

- Windows XP Professional / Windows 7 / Windows 8 / Windows 10
